AYUSH KHODANKAR

Software Engineer – Java17 — Spring Boot —AWS/GCP— Microservices
ayushkhodankar01@gmail.com — +91-9131895660 — LinkedIn — GitHub — Portfolio

Professional Summary

Full Stack Software Engineer with 2.5+ years of experience building payment-grade, cloud-native applications using Java, Spring Boot, and Angular/TypeScript, and integrating AI/ML features into production systems. Built REST APIs and event-driven pipelines handling 500K+ daily transactions on AWS and GCP. Strong in microservices, system reliability, and shipping end-to-end features, from UI to database to deployed model.

Skills

Frontend: ReactJS, Angular, TypeScript, JavaScript, HTML5/CSS3, REST API integration, automated testing

Backend: Java 17, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Microservices, REST API design, OAuth 2.0 / JWT, Spring Data JPA / Hibernate (ORM

AI/ML: Python, Vertex AI, Generative AI (LLMs, prompt engineering, RAG, embeddings), text summarization, anomaly detection

Data and Messaging: Kafka, GCP Pub/Sub, MySQL, Redis, BigQuery, MongoDB, Airflow, SQL query optimization

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, Jenkins, CI/CD, Git,GitHub

Professional Experience

Accenture May 2024 – Present
Software Engineer

- Built and maintained 20+ Java/Spring Boot REST APIs across 10+ microservices for a payments platform handling 500K+ transactions and $2M+ in volume per day.
- Implemented idempotency keys, retry logic and exception handling in settlement and reconciliation flows, cutting duplicate transactions by 40% and recovery time by 30%.
- Built Kafka and GCP Pub/Sub pipelines feeding BigQuery, MySQL and Redis, processing 1M+ events daily and reducing processing latency by 25%.
- Integrated Vertex AI and GenAI models for text summarization and real-time anomaly detection, improving detection accuracy by 20% over the manual-review baseline.
- Containerized services with Docker and Kubernetes and automated CI/CD on GCP and AWS, cutting deployment time by 35%.
- Built Angular components for transaction tracking on top of these APIs, with 90%+ automated test coverage.
- Conducted code reviews and contributed to architecture design and technical documentation across cross-functional teams.

Infosai Private Limited Jan 2023 – July 2023
Software Engineer Intern

- Enhanced production stability using exception handling and logging; integrated Netflix Zuul and Eureka for API gateway routing and service discovery, optimized MySQL queries via Spring Data JPA/Hibernate, improving performance by ~35%.

Asterisc Private Limited Jun 2023– Dec 2023
Software Engineer Intern

- Collaborated with QA and integration teams to debug production issues, applying API request/response validation using AngularJS on the frontend; improved application scalability and load performance by 25% through optimized coding practices.

Key Projects

Document Q&A Platform | Angular/React, Spring Boot, Python, Vertex AI, Docker | GitHub

• full stack app where users upload documents and ask questions answered by a RAG pipeline using embeddings and vector search on Vertex AI.

• Built Spring Boot APIs with JWT authentication and an Angular chat UI that shows source citations for each answer; containerized with Docker.

Bus Booking Application | Java, Spring Boot, MySQL, OAuth 2.0 / JWT | GitHub

- Built 15+ REST APIs for seat booking and real-time ticket management using Spring Boot, Spring Data JPA and MySQL.
- Implemented OAuth 2.0, JWT authentication, role-based access control and OTP verification across 20+ endpoints.

Education

Bachelor of Engineering in Information Technology Graduated 2023
Priyadarshini Bhagwati College of Engineering, Nagpur Agg. CGPA:7.44 GPA

Certifications

Google Cloud Generative AI Leader— LLMs, Prompt Engineering, RAG, Embeddings, Vector Search
Databricks Machine Learning Associate —Machine Learning, Data Science, Apache Spark ML, Hyperopt
Claude Certified Architect - Foundations —AI System Design, Generative AI Architecture, Claude Code
