## SUMMARY

Java Backend Developer with 2+ years of experience in Spring Boot, Hibernate, Kafka, Redis, Kubernetes, and RESTful APIs, delivering scalable fintech and cloud-integrated backend systems.

## SKILLS

**Technical Skills**: Java 8, JavaScript, SQL, Google Cloud Platform, Oracle Cloud
**Tools & Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Postman, Microservices, MySQL, Jenkins, Docker, REST APIs, GitHub/BitBucket, Postman, Swagger, Maven, Eclipse/IntelliJ
**Certifications**: GCP Associate Cloud Engineer, GCP Gen AI Leader, OCI Foundations Associate, OC Data Management

## WORK EXPERIENCE

### ACCENTURE — Pune, India
**Software Engineer - Analyst** — May 2024 – Present

- Designed and developed 20+ RESTful APIs using Java and Spring Boot for a production-grade payment processing system, achieving 99.9% uptime and high-throughput transaction handling.
- Engineered an end-to-end payment processing pipeline covering settlement, reconciliation, and real-time transaction tracking, ensuring accurate financial data flow across services.
- Implemented idempotent API design patterns to eliminate duplicate transaction processing and enforce data consistency across distributed microservices.
- Developed scheduler-based batch processing jobs with configurable retry and recovery logic to handle partial failures and ensure reliable transaction completion.
- Integrated GCP BigQuery and Pub/Sub to build event-driven analytics pipelines and AI-based data processing workflows, extracting actionable insights from high-volume transactional data.
- Leveraged Gen AI capabilities and Vertex AI to prototype intelligent data summarisation and anomaly detection features within analytics pipelines, applying hands-on knowledge from GCP Generative AI certification.
- Conducted unit testing and API validation using Postman; participated in Agile Scrum ceremonies including sprint planning, peer code reviews, and client demos via JIRA and Confluence.

### INFOSAI PVT. LTD. — Nagpur, India
**Java Developer Intern** — Jan 2023 – Aug 2023

- Implemented exception handling, logging, and monitoring to improve production stability and observability.
- Optimized database queries and indexing using Spring Data JPA + Hibernate + MySQL, improving application performance by ~30%.

### ASTRERISC TECHNOCRATS — Nagpur, India
**Software Developer Intern** — Jun 2022 – Jan 2023

- Collaborated with QA and integration teams to debug production issues and ensure smooth data flow — applied API request/response validation and HTTP status handling.
- Improved application scalability and load performance by 25% through optimized code practices.

## PROJECTS

### BANKING SYSTEM — GitHub Repo

- Built banking functionalities with Java and Spring Boot; optimised APIs reducing backend load by 20%.
- Integrated Zuul and Eureka for dynamic routing and scalable architecture.

### STUDY-STREAM — GitHub Repo

- Developed backend using Spring Boot for an e-learning platform supporting live classes and chat interactions.
- Designed RESTful APIs for certification workflows, exams, and scalable learning modules.

## EDUCATION

### PRIYADARSHINI BHAGWATI COLLEGE OF ENGINEERING — Nagpur, India
Bachelor of Engineering, Information Technology — Jul 2019- Jun 2023
Cumulative GPA: 7.44/10

## ACTIVITIES

### GOOGLE DEVELOPER CLOUD GROUP NAGPUR — Nagpur, India

- Supported cloud events, workshops, and local developer initiatives
